## Create Node-RED Service

Steps followed:
- Navigated to the App creation page

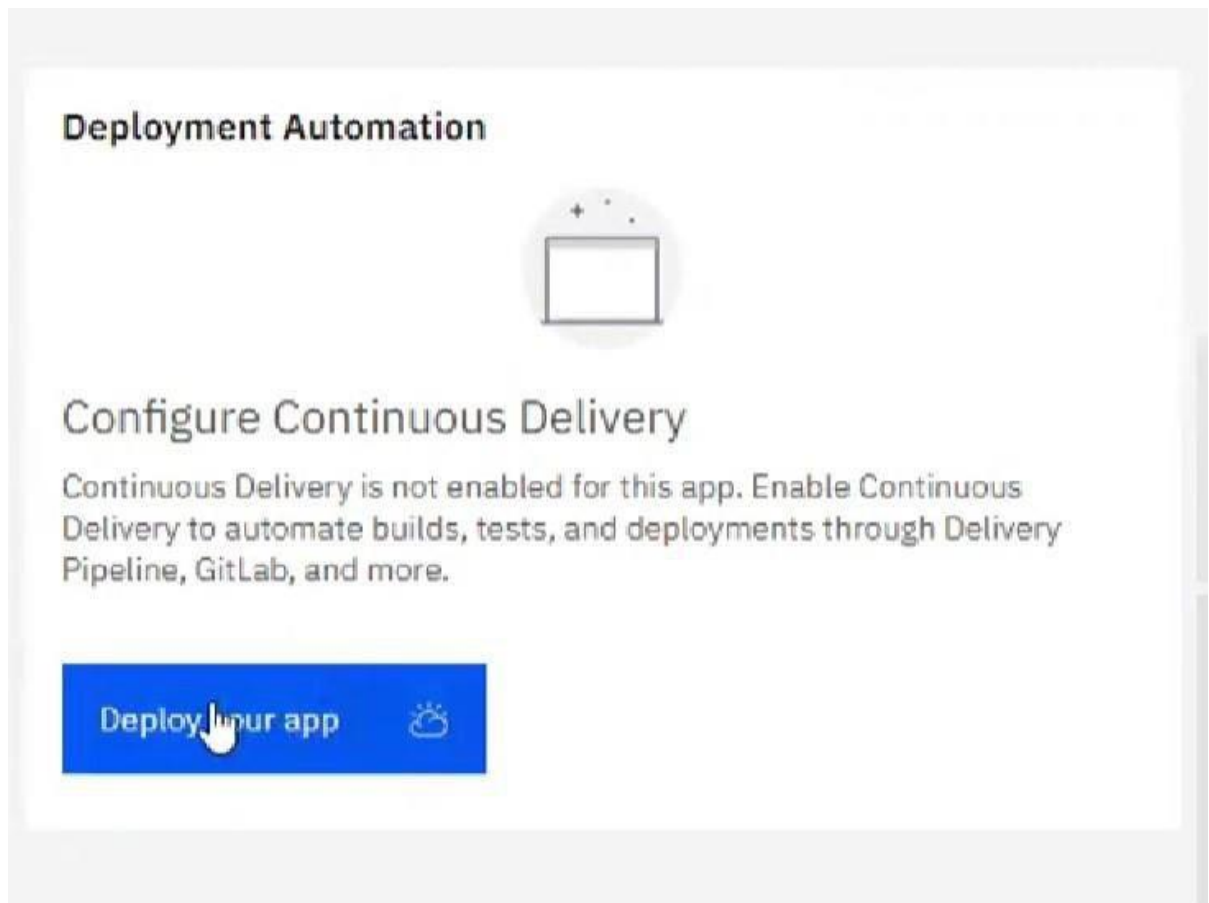

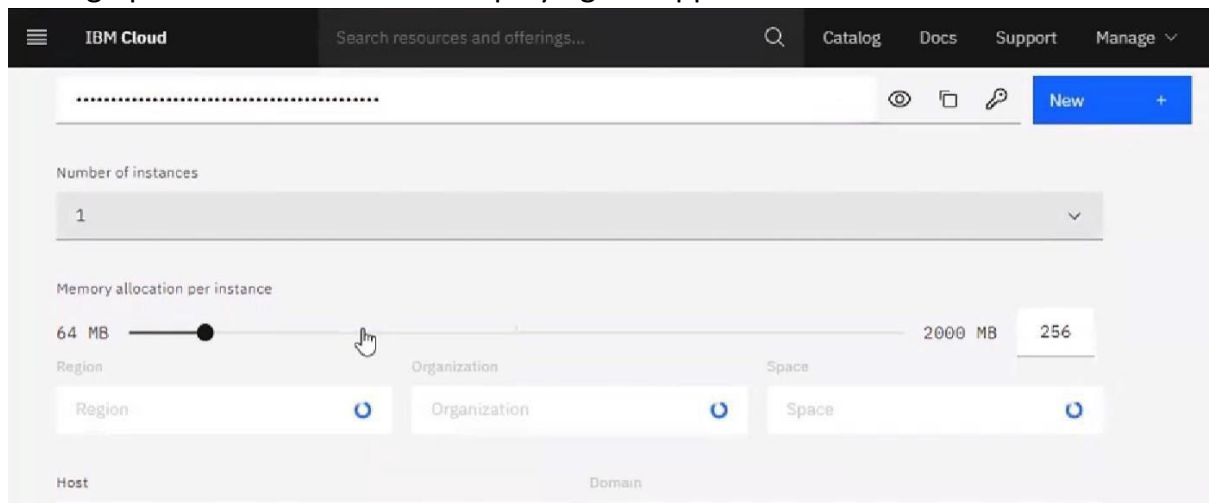

- Entered project details and clicked on create

Clicking on the "Deploy your App" Button

-

- Setting up the environment and deploying the app

  Successfully deployed the app

●

Delivery Pipelines

Name	ci-pipeline [↗]
Status	✓ Success [↗]
Last input	Last commit by IBM Cloud DevOps Services (7 minutes ago) Clone from zip [↗]

● Welcomed by the instance editor

Welcome to your new Node-RED instance on IBM Cloud

We know you're eager to start wiring up your flows, but first there are a couple of tasks you should do:

- Secure your Node-RED editor
- Learn how to install additional nodes
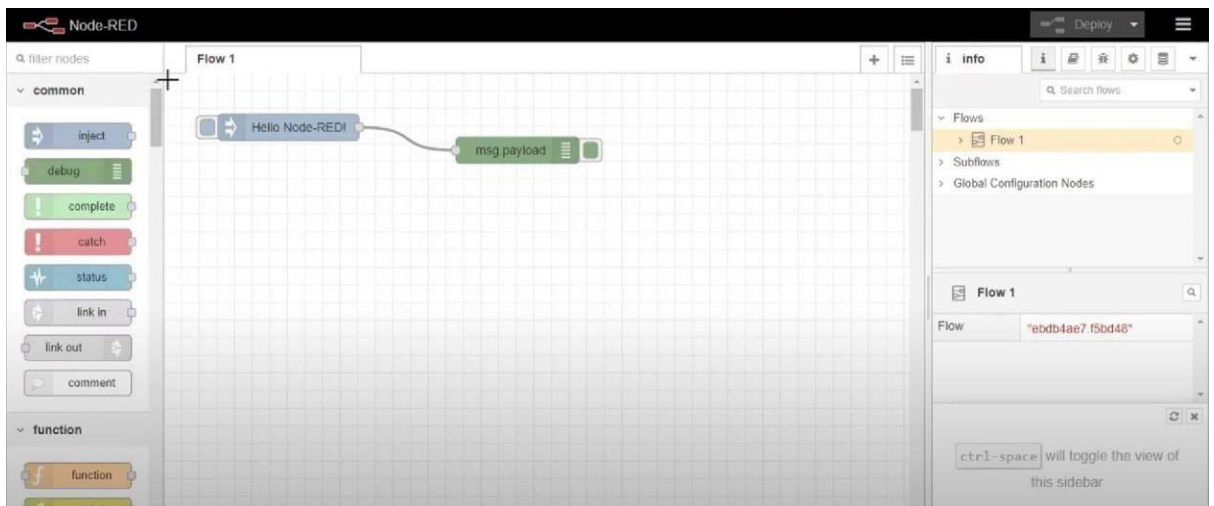

● Setting up credentials

○ Secure your editor so only authorised users can access it

◉ *Not recommended*: Allow anyone to access the editor and make changes

Your editor will not be secured. Anyone with the URL will be able to access your flows, data and bound services.

☑ Tick this box to confirm you want your editor to be insecure

Dragged and dropped components into the editor

-

- Editing some values of the properties

- Successfully deployed the app

Result: Successfully created a NodeRED service on IBM Cloud
